Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

1. Claims 1-6, 14, 15, 16, 18, 19 are rejected under 35 U.S.C. 102(b) as being anticipated by D'Amico (US 5,279,579).

D'Amico discloses in Figures 3 and 6 a safety syringe having a barrel (35), a needle (36), a plunger, and a needle sheath (32) which is rotated into a locking means (66) and a plug (40) engageable with the sheath having at least one receptacle (flat bottomed portion) to engage an outer circumference of the sheath and a flange (annular wall) to engage an inner circumference.

### *Claim Rejections - 35 USC § 103*

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 7, 13, 20-24, 32, and 33 rejected under 35 U.S.C. 103(a) as being unpatentable over Reich (6,722,499) as modified by D'Amico.

Art Unit: 3767

Reich discloses in Figure 3 a pharmaceutical pig having a base (22) and a cap (20) capable of receiving a syringe having a safety feature comprising a cap (108). Reich discloses the claimed invention except for the syringe have a safety feature comprising a needle sheath and a plug engageable with the sheath. D'Amico discloses in Figures 3 and 6 that it is known to use a safety syringe having a barrel (35), a needle (36), a plunger, and a needle sheath (32) and a plug (40) engageable with the sheath having at least one receptacle (flat bottomed portion) to engage an outer circumference of the sheath and a flange (annular wall) to engage an inner circumference. It would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the safety syringe system of Reich with the safety syringe system of D'Amico since such a modification would provide the system of Reich with an automatic safety shielding system that would provide more safety for those handling hazardous syringes.
